## ESNA TECHNOLOGIES RECEIVES 2008 NORTH AMERICAN FROST & SULLIVAN AWARD FOR TECHNOLOGY INNOVATION

The 2008 Frost & Sullivan North American Technology Innovation Award in the field of *presence management systems* goes to Canada-based Esna Technologies Inc. for its presence platform Telephony Office-LinX. It is a cost-effective solution catering to a wide range of business segments. The company provides offerings for large enterprises as well as small and medium businesses by providing easy access for remote users with employees.

The **2008 Frost & Sullivan North American Technology Innovation Award** further validates our leadership in the presence and unified communication space for enterprises. Telephony Office-LinX is the only platform in the industry that offers interoperability to any phone system, any mobile device, any email/groupware solution, business application and any operating system. It truly is designed to meet the needs of an actual business that has fragmented pieces of architecture, devices and application across their organization.

Esna's technical superiority and its ability to consistently innovate to meet enterprise demands with the help of their presence platform, Office-LinX, makes them the worthy recipient of the **2008 Frost and Sullivan Technology Innovation Award**.

**Frost & Sullivan's Technology Innovation Award** is bestowed upon a company (or individual) that has carried out new research, which has resulted in innovation(s) that have or are expected to bring significant contributions to the industry in terms of adoption, change, and competitive posture. This award recognizes the quality and depth of a company's research and development program as well as the vision and risk-taking that enabled it to undertake such an endeavor.

Davide Petramala  
Vice President Sales & Marketing  
Esna Technologies Inc. (Esnatech)
