UNIFIED COMMUNICATIONS TRANSFORMS BUSINESS COMMUNICATIONS

UNIFIED COMMUNICATIONS TRANSFORMS BUSINESS COMMUNICATIONS, BUILDING LONG-TERM STRENGTH IN THE COMMUNICATION INFRASTRUCTURE AND IMPROVES EVERY ASPECT OF AN ORGANIZATIONS' COMMUNICATION AGILITY.

Employees can increase mobility, improve communication capabilities and ultimately enhance productivity with unified communications.

The key is to deliver mobility, rich presence, and unified messaging in one single application that integrates with all aspects of your business communications. Incrementally each technology adds increasing value to your business, integrated together they deliver exponential value and substantial cost savings. It will change the way business communicates.

Esna Unified Communications combines these multiple communication and collaboration technologies into one application accessible using a single interface and integrated with enterprise applications providing substantial benefits to organizations and their customers.

Key to UC technologies businesses can use everyday.

1. Built-in Presence, showing who is available and accessible
2. Built-in Unified Messaging, which lets you receive and respond to voice mails and faxes quickly, as you would an email, and respond and manage email over the phone as you would voice mail.
3. Built-in Info Status Pop-ups to keep you informed when a new call comes in.
4. Microsoft® Outlook® Integration means users can handle all their communications in one application that they're familiar with already.
