20 YEARS OF SUCCESS CHANGING THE WAY BUSINESS COMMUNICATES

Esnatech is celebrating 20 years of success in the Unified Communications industry. We have grown from a three-man startup in a garage back in '89 to an international success story in communications with over 1 million users of our technology worldwide and a global presence of our technology with an international partner network across 30 countries.

The founders, staff and partners want to thank everyone for providing us with an opportunity to really do something we are passionate about and solve real business issues with our award-winning UC technology!

In the past 24 months we have expanded our partner network, almost doubling our certified engineers globally and we have successfully launched our online education center to better service our partners growing knowledge needs (http://www.esnatech.com/services/education/eLearning/el_Logon.aspx)

We have also launched our YouTube channel: Ucommunicate! (<http://www.youtube.com/user/Ucommunicate>) to provide online content to educate end-users on our technology as well. In the past 12 months, aiming to provide content of our growing portfolio of technology we have launched our Slideshare site (<http://www.slideshare.net/davide.petramala>). When online with Twitter.com, checkout (<http://twitter.com/poweredbyesnaUC>) to provide real-time updates on customers and technology as well, marketing@esna.com went online with Facebook. We have just launched several new blog sites for weekly updates:

- Daily Esnatech Marketing Blog: <http://esnatechuc.blogspot.com/>
- Esnatech Support Blog: <http://ucsupport.blogspot.com>

Here is to 20 years of unsurpassed success and to another 20 years of doing what we love and enjoying every minute of it.
