

## UNIFIED COMMUNICATIONS FOR THE APPLE IPHONE

Esnatech launches Mobile UC Client software for the Apple iPhone that links the mobile device to any office telephone system.

**Richmond Hill, ON Canada, April 15, 2009** — Esna Technologies Inc. (Esnatech) a market leader in enterprise unified communications, has launched a version of their market leading mobile unified communication software for the Apple iPhone and iPod touch devices. The mobile UC software, Mobile UC Client delivers fixed-to-mobile convergence for a wide range of wireless devices with enterprise PBX systems such as Cisco, Avaya, Mitel, Nortel, Iwatus, Aastra, 3com, Asterisk, etc.). It provides a complete communications and collaboration solution for mobile users; integrating presence, messaging, mobility and computer telephony to users over their mobile devices. The intergration of unified communications onto these wireless devices will dramatically increase the ability of mobile users to connect with their office and be able to communicate as if they were at their desk. Esnatech has released a version specifically for iPhone users so they can link their devices to their office telephone system and leverage the iPhone as their office communication device.

“With the release of our newest Mobile UC Client software for Apple’s iPhone, we provide enterprises the opportunity to offer full enterprise communications to iPhone users”, said Davide Petramala, Vice President Business Development at Esnatech. “Integrated with the Esnatech UC server platform, Telephony Office-LinX, iPhone users can manage all their office communications such as find me/follow me, presence, and instant messaging directly from their device. This once again demonstrates Esnatech's market leadership in interoperability as we extend our UC services to any telephone system, any business application, and now to any mobile device including Apple iPhone and iPod touch devices.”

With the new Mobile UC Client software, users of Esnatech Unified Communications platform would have access to the following features directly from their Apple iPhone:

- Users can manage their office presence and integrate with enterprise presence solutions such as Microsoft Live Communication Server
- Users can define their presence even when on their Apple iPhone, to their colleagues in the office
- See and find the presence and availability of their colleagues in the office
- Initiate and/or participate in enterprise instant messaging sessions
- View complete call history, including real-time view of inbound, outbound and missed calls to and from your office telephone
- Manage live calls directly from an Apple iPhone

The new mobile application loads on both the Apple iPhone and iPod touch connecting via IP to the Telephony Office-LinX platform, which is connected to both the enterprise PBX and email platform. Users will have the ability to view their workgroups and see who is online and available. With access to real-time status, they can then choose the best way to communicate with co-workers. This will dramatically improve the connectivity of the wireless users to their office environment and improve productivity by delivering anywhere, anytime access to critical resources.

The new Mobile UC Client software for the iPhone is available as a free download for a limited time from the Apple Software store that can be accessed directly from any users' device or from iTunes by simply searching for Esna, or UC Client.

### About Telephony Office-LinX

The Esnatech Telephony Office-LinX platform is already tightly integrated with MS Exchange, IBM Lotus Domino, Novell GroupWise, Apple MAC OS, Apple iPhone, Research in Motion Blackberry, Nokia devices, and MS wWindows mMobile devices. The gateway server can be administered directly from an organization's Microsoft Management Console or through Terminal Services over the web. Users can be managed through Active Directory and Group Policy.
