

Esnatech enables businesses to integrate **voice, mobility** and **presence** with the Cloud and Google® Apps.

Esnatech Completes Cisco Interoperability Verification Testing, Announces Office-LinX Cloud Connect Edition

Richmond Hill, ON, Canada, January 11, 2012—Esna Technologies (Esnatech), a leader in cloud-enabled unified communications, announced today the availability of its Office-LinX™ Cloud Connect Edition which has successfully completed interoperability testing* with Cisco Unity Connection 8.5. Esnatech is a member of the Cisco Developer Network as a Registered Developer within the unified communications technology category.

The Cisco Developer Network unites Cisco with third-party developers of hardware and software to deliver tested interoperable solutions to joint customers. As a Registered Developer, Esnatech offers a complementary product offering and has started to collaborate with Cisco to meet the needs of joint customers.

With offerings such as the Office-LinX Cloud Connect Edition, customers can more quickly deploy a broad

range of Cisco Compatible business applications, devices, or services that can enhance the capabilities, performance, and management of their Cisco network.

For more information on Office-LinX Cloud Connect Edition's interoperability with Cisco Unity Connection 8.5 visit Esnatech's partner page on the Cisco Developer Network site.

* Interoperability testing is designed to simulate typical customer configurations, and does not replace the need for on-site testing in conjunction with actual implementation.

Esnatech enables businesses to integrate **voice**, **mobility** and **presence** with the Cloud and Google® Apps.

About Esnatech

Esnatech is a global leader in cloud-enabled unified communication solutions. The award-winning Office-LinX™ platform provides today's hybrid enterprise with mobility, presence, and messaging applications that significantly improve workforce productivity. Office-LinX is interoperable with any voice, mobile and PBX system and seamlessly connects with cloud-based applications such as Google Apps, VMware Zimbra®, Salesforce.com and Microsoft® Office365. Through a global network of OEM and reseller partners, the Office-LinX solution has been deployed to millions of users and is available in more than 28 countries worldwide.
