

ESNATECH THE LEADER IN ENTERPRISE COMMUNICATIONS UNIFIES AND SIMPLIFIES BUSINESS COMMUNICATIONS SOLUTIONS

A GLOBAL REPUTATION FOR LEADERSHIP AND INNOVATION

With over 500,000 users in more than 28 countries, we deliver next-generation unified communication solutions to a broad enterprise audience. From companies as small groups to large enterprises, our solutions satisfy the needs of unified communications (mobility, messaging, presence), Contact Center and Fax Server markets, as well as mobile workforces. Esnatech’s innovative technology is consistently recognized as leading edge, having won Frost & Sullivan Innovation for Best Practices, Product of the Year, Editors Choice and several ‘Best of Show’ awards.

DEMONSTRATED VALUE AND RETURN ON INVESTMENT

From a simple telephone to a laptop or PDA, our Unified Communication solutions enable users to control and manage their information access and content. Unified Communication technology allows users to access their office anywhere with or without access to a computer or Internet connection. The flexibility of this system provides dynamic improvements in worker productivity, time savings and reduced equipment costs. Starting with a modest investment, an Esnatech solution can generate immediate savings and a payback within weeks of implementation.

IMAGINE ALL THIS VALUE WITH NO CHANGE TO YOUR BUSINESS! THAT’S WHAT WE DO. WE UNIFY AND SIMPLIFY THE WAY BUSINESS COMMUNICATES!

ESNATECH PROVIDES COMMUNICATION SOLUTIONS FOR BUSINESSES AND PEOPLE TO COMMUNICATE ANYTIME, ANYWHERE - USING ANY DEVICE!

OUR MISSION TO DELIVER COMMUNICATION SOLUTIONS WHICH ENABLE BUSINESSES TO COMMUNICATE ANYWHERE, ANYTIME, FROM ANY DEVICE

Our Unified Communication solutions help your business instantly access, manage, and organize information effectively. Our technology empowers your organization with flexibility and simplicity to conduct business at any time, from anywhere, so that you can manage the information you need, when you need it.

OUR VISION TO SET THE STANDARD FOR THE WAY BUSINESSES COMMUNICATE

Unify & Simplify the way your business communicates. Our goal is to deliver instant communication solutions that are *simply the best way to communicate*. Our Unified Communication systems operate on a stand-alone basis, working alongside a company's current PBX or phone system, or integrating with the current network infrastructure. Our instant communications solution delivers advanced features such as office mobility, speech technology, unified messaging, presence management and instant messaging. In addition to boasting a rich solution suite, investment in an Esnatech solution also delivers investment protection and platform upgrade capabilities, all without the planned obsolescence commonly found in many communication platforms today.

Our products operate on off-the-shelf hardware, supporting Microsoft® Windows® 2000/XP/2003 platforms while interfacing with a wide variety of telephony and related computer equipment. Our products integrate with more than 100 different IP and circuit-based telephone systems such as Cisco, Avaya, Nortel, 3Com, NEC, Mitel, Toshiba, Iwatsu, Panasonic and many more.

Simply
the best way to communicate!

Unify & Simplify
all your daily communications

GREEN CORPORATE INITIATIVE

Unified Communications is about TALKING GREEN

WHAT IS UNIFIED COMMUNICATIONS?

For Esnatech Unified Communications provides a single tool set for real-time communications. Users can see if the person they need to communicate with is available and then, with a single click, choose to interact with them through instant messaging, voice or video regardless of location.

WHAT DOES IT TAKE TO DRIVE THIS UNIFIED COMMUNICATION?

With most vendors, the integration of technology brings with it a whole onslaught of hardware to drive speech server, telephony server, mobility server etc. Organizations and technologies typically neglect both the management needed and the wasted power consumption to drive UC, which includes and is not limited to the requirement of industrial cooling so the technology and it's infrastructure simply does not blow up!

Investigate this further, one office tower, 100 tenants, each with a minimum of 5-10 servers in a room driving business applications. The servers, the ventilation (in many cases air conditioners), it adds up! Esnatech understands this and in our efforts to push our green initiative of "talking green" we focus on ways to take advantage of unified communications but deliver it in a format and footprint that requires minimal infrastructure and resources to both deploy and use the technology.

Esnatech's investment in virtualization, thin computing and software as a service integration has pushed us as the leader in this space of GREEN UNIFIED COMMUNICATIONS.

Integrating Unified Communications technology with these low footprint environments allows organization to do their part while still driving their business. Thin computing with SAAS based applications consolidate power consumption in hubs that have economies of scale, leaving the business with

simply productivity tools that allow them to communicate without the overhead to manage and maintain. Esnatech's market leading UC solution for GOOGLE™ Applications demonstrates how organizations can turn on anywhere access to ALL communications with the least effect on our environment.

Investing in SAAS solutions linked to a single Unified Communications gateway driving consolidated Unified Communications application allows

companies to avoid making dramatic changes in their infrastructure, but significantly reducing not only their annual management costs of these application platforms, but the amount of wasted power consumption each business uses on an annual basis. THIS IS "TALKING GREEN!"

Simply
the best way to communicate!

GIVE YOUR BUSINESS INSTANTANEOUS COMMUNICATIONS!
IT'S SIMPLY THE BEST WAY TO COMMUNICATE!

OUR HISTORY CELEBRATING OVER 20 YEARS OF UNIFYING & SIMPLIFYING BUSINESS COMMUNICATIONS
