DELIVERING SOLUTIONS FOR THE HEALTHCARE INDUSTRY

TELEPHONY OFFICE-LINX™ HAS THE RIGHT PRESCRIPTION FOR SAVING COSTS AND STREAMLINING COMMUNICATIONS—AGENCIES LOOKING TO ALLEVIATE THE PAPERWORK BURDEN, AS WELL AS INCREASE STAFF EFFICIENCY, SHOULD CONSIDER VOICE PROCESSING SOLUTIONS.

Esnatech's speech and messaging system, Telephony Office-LinX™ makes communication with sometimes difficult-to-reach homecare workers easier and more effective. Specifically for the Senior Living Community marketplace, including Assisted Living, Independent Living, Continuing Care Retirement Communities and Senior Housing.

Whether a Senior Living Community needs an emergency call system for new construction to replace or upgrade an existing nurse call or pull cord system, incorporate common area coverage or to integrate more efficient monitoring, paging or staff communication solutions, Telephony Office-LinX™ and its dealers offer customized solutions to meet each client's needs and budget. This includes speech-enabled emergency response systems.

Leveraging speech technology any individual on the premise can use any phone on the premise to initiate an emergency response

sequence, or say keywords to be associated to different emergencies or operational policies, automating access to assistance and onsite resources.

EMERGENCY RESPONSE SYSTEMS

Telephony Office-LinX™ is all about security, convenience and choice.

HERE'S HOW IT WORKS

- ◀ The sender decides whether to send a fax, e-mail or voice mail message
- ◀ The recipient then chooses how to access that message, unencumbered in any way by the form of the message
- ◀ Senders and recipients can choose the device they wish to use to send/receive messages therefore dramatically improving productivity and overall corporate responsiveness

DELIVERING SOLUTIONS FOR THE HEALTHCARE INDUSTRY

With our advanced Speech-enabled response systems, you can remotely assess the nature of a residents alarm via system notification or SMS to off-site wireless devices and determine the appropriate response, saving staff time by eliminating unnecessary steps.

Esnatech's Speech Notification Systems give healthcare staff increased mobility, allowing them to perform their job more effectively and from anywhere within the facility. Hospital workers have immediate access to each other and most importantly, patients.

Within an Esnatech Speech System, healthcare providers offer better care resulting in higher patient satisfaction.

- ◀ Patients | higher level of care, faster recovery
- ◀ Nurses | less stress, more time with patients
- ◀ Physicians | direct access to nurses and staff
- ◀ Emergency Department | faster response time, increase efficiency
- ◀ Support Staff | coordinate efforts to save time and eliminate needless steps
