Communicate and collaborate anytime, anywhere

Esna Cloudlink for Cisco is a unique collaboration solution that integrates Cisco messaging and Jabber collaboration tools inside the business applications you use every day to get work done.

Cloudlink for Cisco makes it easy for you to connect, communicate and collaborate with team members. With Cloudlink for Cisco you can make voice and video calls, send instant messages, check presence and manage your voice messages without having to log in and out of different applications. Now you can stay in the applications you're already working in and communicate in real time.
