

UC BEST PRACTICES FOR DEPLOYMENT

PRE-INSTALL CHECKLIST

Deploying technology such as UC is a very challenging task. It involves many network aspects and bridges TDM, IP and wireless networks together in one seamless communication infrastructure. For this reason, we have deployed a PRE-INSTALL CHECKLIST that UC resellers should follow prior to an Esnatech UC deployment. This checklist becomes your planning guide to a smooth and flawless operation covering all relevant aspects to a success deployment.
